

POPCORN

Preventing Oil and Plastics Contamination of Ocean Regions of the North

POPCORN – Preventing Oil and Plastics Contamination of Ocean Regions of the North

POPCORN (7/2011 – 6/2022) is a clustering project that brings together three Northern Periphery and Arctic Programme projects and one Baltic Sea Region project

The aim of POPCORN is to improve environmental protection of the Northern seas and to contribute to the wellbeing of marine environment

The outcomes of the participating projects are disseminated and shared with new regions and organisations in order to maximise the outreach of these projects

POPCORN is co-funded by EU's Northern Periphery and Arctic Programme.
